

CONSULTATION NOTE — ENDOCRINOLOGY OPD

Patient	Meena Pillai	Date	22-Feb-2025
Age/Sex	45 Years / Female	Visit	Follow-up (3rd)
Consultant	Dr. Ramesh Iyer, DM Endocrinology	Weight	82 kg
BP	122/78 mmHg	Pulse	74 bpm

ACTIVE PROBLEMS

- Hypothyroidism — on Levothyroxine, TSH still above target
- Polycystic Ovarian Syndrome (PCOS) — oligo-amenorrhoea, hirsutism
- Major Depressive Disorder — on Sertraline, partially controlled
- Insulin Resistance / Pre-diabetes — FBS 112, HbA1c 6.1%
- Obesity — BMI 32.4 kg/m²

ALLERGY HISTORY

ALLERGY: Codeine — nausea, vomiting, severe drowsiness. AVOID opioids.

No other known drug allergies.

CURRENT MEDICATIONS

Medication	Dose	Since	Notes
Levothyroxine	75mcg OD	2022	Take on empty stomach, 30min before food
Sertraline	50mg OD	2023	Psychiatry prescribed
Metformin	500mg BD	2024	Insulin sensitiser for PCOS + pre-diabetes
Myo-Inositol	2g BD	2024	For PCOS — OTC supplement
Vitamin D3	60,000 IU weekly	2024	Deficient — 14 ng/mL
Calcium + Magnesium	500mg OD	2024	Bone support

TODAY'S LABS

Test	Result	Reference	Status	Trend
TSH	6.8 mIU/L	0.5–4.5	HIGH ↑	Was 9.2 in Nov 2024
Free T4	0.9 ng/dL	0.8–1.8	NORMAL	—
Free T3	2.8 pg/mL	2.3–4.2	NORMAL	—
Anti-TPO Ab	142 IU/mL	< 35	HIGH — Hashimoto's	—
HbA1c	6.1%	< 5.7% normal	Pre-diabetic	Was 6.4% in Aug 2024
Fasting Blood Sugar	112 mg/dL	70–100	BORDERLINE	Was 118 in Aug 2024
Vitamin D	22 ng/mL	30–100	INSUFFICIENT	Was 14 in Sep 2024
LH/FSH ratio	2.8	< 2 (normal)	ELEVATED — PCOS	—
Total Testosterone	0.62 ng/mL	0.06–0.82	UPPER NORMAL	Hirsutism related
Lipid Profile — LDL	138 mg/dL	< 130	BORDERLINE	—

ASSESSMENT AND PLAN

- Hypothyroidism — TSH improving (9.2 → 6.8) but still above target. Increase Levothyroxine to 100mcg OD. Recheck TSH in 8 weeks.
- PCOS — continue Metformin + Myo-Inositol. LH/FSH improving.
- Depression — refer back to Psychiatry. Sertraline may need dose increase.
- Pre-diabetes — improving (HbA1c 6.4 → 6.1). Lifestyle counselling reinforced. Continue Metformin.
- Vitamin D — improving (14 → 22). Continue weekly D3 60,000 IU for 8 more weeks then switch to 2000 IU daily maintenance.
- Weight management referral — dietitian and physiotherapist.
- **AVOID: Codeine, tramadol, opioid analgesics** — documented intolerance.
- Next review in 8 weeks with repeat TSH, HbA1c, Vitamin D.
