

LAB REPORT — CARDIAC FOLLOW-UP PANEL

Patient	Arjun Mehta	Age/Sex	42 / M
Ref. No.	OPL-2025-0318	Date	12-Jan-2025
Consultant	Dr. Venkat Rao, DM Cardiology	Specimen	Fasting blood (12hr fast)

Post-MI 4-month follow-up labs. Fasting sample collected at 8:00 AM.

CARDIAC BIOMARKERS

Test	Result	Reference	Status	Sep 2024 (Admission)
Troponin I	< 0.01 ng/mL	< 0.04	NORMAL	48.2 ng/mL (STEMI)
CK-MB	12 U/L	< 25 U/L	NORMAL	284 U/L (STEMI)
NT-proBNP	286 pg/mL	< 300 pg/mL	NORMAL — borderline	—
hs-CRP	1.8 mg/L	< 3.0 mg/L	NORMAL — low inflammation	

Cardiac biomarkers normalised — no evidence of ongoing myocardial injury. NT-proBNP borderline — consistent with EF recovery from 35% to 48%.

LIPID PANEL — POST-STATIN THERAPY

Test	Sep 2024	Jan 2025	Change	Target	Status
Total Cholesterol (mg/dL)	242	148	↓ 94	< 150	AT TARGET
LDL Cholesterol (mg/dL)	178	61	↓ 117	< 55 (STEMI)	NEAR TARGET
HDL Cholesterol (mg/dL)	36	44	↑ 8	> 40	NORMAL
Triglycerides (mg/dL)	188	124	↓ 64	< 150	NORMAL
Non-HDL Cholesterol	—	104	—	< 85	BORDERLINE
Lp(a) (mg/dL)	—	42	—	< 30	ELEVATED — residual risk

Excellent lipid response to Atorvastatin 80mg. LDL 61 mg/dL — close to STEMI target of < 55 mg/dL. Lp(a) elevated — independent cardiovascular risk factor, not statin-modifiable. Consider Ezetimibe addition.

COMPLETE BLOOD COUNT

Test	Result	Reference	Status
Haemoglobin	14.2 g/dL	13–17 g/dL	NORMAL
WBC	6,800 /μL	4,000–11,000	NORMAL
Platelets	2,24,000 /μL	1.5–4.5 lakh	NORMAL
Neutrophils	62%	50–70%	NORMAL
Eosinophils	2%	1–4%	NORMAL

METABOLIC PANEL

Test	Result	Reference	Status
Fasting Blood Sugar	94 mg/dL	70–100	NORMAL

HbA1c	5.6%	< 5.7%	NORMAL — not diabetic
Serum Creatinine	1.0 mg/dL	0.7–1.2	NORMAL
eGFR	82 mL/min	> 60	NORMAL
Serum Potassium	4.1 mEq/L	3.5–5.1	NORMAL
Serum Sodium	139 mEq/L	135–145	NORMAL
ALT (SGPT)	28 U/L	< 40 U/L	NORMAL — liver tolerating statin
AST (SGOT)	24 U/L	< 40 U/L	NORMAL

Liver enzymes normal — high-dose Atorvastatin 80mg well-tolerated. Renal function normal. No metabolic complications from post-MI medications.

COAGULATION — ANTIPLATELET MONITORING

Test	Result	Reference	Status
Platelet Aggregation (ADP)	On Clopidogrel — inhibited	—	ADEQUATE antiplatelet effect
INR	1.0	0.9–1.1	NORMAL — not on warfarin
PT	12.4 sec	11–13 sec	NORMAL

REMINDER: Patient on DAPT (Aspirin 75mg + Clopidogrel 75mg). DO NOT stop either antiplatelet without cardiology clearance. Stent thrombosis risk is fatal.

THYROID FUNCTION (BASELINE)

Test	Result	Reference	Status
TSH	2.1 mIU/L	0.5–4.5	NORMAL
Free T4	1.2 ng/dL	0.8–1.8	NORMAL

Thyroid function normal. Statin therapy can rarely affect thyroid — baseline established for monitoring.
